

With a counter, participants will move through the spaces with the aim of finishing the game before the other participants.

To move through the board, participants will throw the provided dice (with 6 colours instead of numbers) and move to the next space matching the colour of the dice. If the participant lands on one of the actions, s/he must identify if the action is positive or negative and move accordingly: forward if the action is positive, backwards if the action is negative.

Players will choose a captain for the game who will be in charge of the Answer Sheet, a handout which indicates if actions are positive or negative.
